

JANNSEN AGUSTIN

Splunk Engineer | Splunk Administrator | Data Onboarding Specialist

Edmonton, Alberta, Canada | +1 (587) 891-0214 | jannsenagustin.can@gmail.com | linkedin.com/in/jannsenagustin | jannsenagustin.github.io/resumeops

PROFESSIONAL SUMMARY

Splunk Developer and Administrator with 7+ years of hands-on experience supporting, administering, and optimizing large-scale Splunk environments across multi-tenant, enterprise-grade deployments. Deep expertise in Splunk Enterprise administration, high-volume log onboarding, SPL development and optimization, dashboards, monitoring, alerting, troubleshooting, and performance tuning. Experienced integrating application, network, security, web, and database data sources using HEC, REST APIs, and Splunk Universal Forwarders, with additional experience in Splunk Cloud migration, security remediation, Linux, AWS, and deploying Splunk configuration changes through established Azure DevOps CI/CD workflows.

CORE SKILLS

Splunk Platform: Splunk Enterprise Administration & Support, Splunk Cloud, SPL Query Development & Optimization, Splunk Dashboards & Reporting, Log Management, Monitoring & Alerting, High-Volume Data Onboarding (HEC, REST API, Universal Forwarders), Troubleshooting & Performance Optimization, Splunk Datamodeling, Splunk Cluster Management, props.conf, transforms.conf, inputs.conf, Technical Add-on / Splunkbase App Deployment, Splunk Enterprise to Splunk Cloud Migration, Security Vulnerability Remediation

Platform & Infrastructure: Docker, Docker Compose, Containerized Splunk Environments, Hyper-V Virtualization, Generation 2 Virtual Machines, Virtual Networking (External Virtual Switches), Virtual Machine Provisioning, Secure Boot Configuration, Infrastructure Validation & Rollback Planning

AI-Assisted Engineering: AI Workflow Integration, AI-Assisted Software Development, AI-Assisted Code Review, Technical Prompt Design, AI-Assisted Documentation, Human-in-the-Loop Review & Validation

Engineering & Operations: Splunk Configuration Deployment via Azure DevOps CI/CD, Evidence-Driven Documentation, Architecture Documentation, GitHub, ServiceNow, Confluence, JIRA

Operating Systems & Data: Linux Systems Administration, AWS, SQL

WORK EXPERIENCE

Accenture Inc.

Nov 2015 - Mar 2024

Data Management & Governance Specialist, Splunk Engineer & Administrator

Metro Manila, Philippines (supporting global enterprise clients) | Tech Stack: Splunk Cloud, Splunk Enterprise, Linux, AWS, Azure DevOps, SQL, GitHub, ServiceNow, Confluence, Citrix

Client: Shell EU - Splunk Cloud Migration & Data Onboarding

- Led data onboarding initiatives, configuring and integrating diverse log sources - including application, network, and security event data - ensuring 100% data parsing accuracy and enabling efficient cybersecurity monitoring.
- Participated in migration from Splunk Enterprise to Splunk Cloud, validating app compatibility, index configurations, data parsing, roles, and capabilities throughout the transition.
- Onboarded new data sources and managed Splunk Universal Forwarder deployments across application, web, and database servers.
- Deployed Splunk configuration changes using established Azure DevOps CI/CD pipelines through the Splunk Deployment Server, following existing enterprise change-management processes.
- Installed, configured, and maintained Splunkbase apps and technical add-ons, ensuring compatibility and functionality across platform upgrades.
- Participated in Splunk component upgrades to address security vulnerabilities, validating app compatibility with new versions.
- Managed sprint-based incident and change ticket resolution, closing 95%+ of tickets within the two-week sprint cycle and exceeding SLA targets.

Client: Ameren US - Platform Reliability & Automation

- Administered multi-component Splunk environments, performing system monitoring and troubleshooting to maintain 100% uptime across indexers, search heads, and forwarders.
- Developed and maintained automated operational and reporting dashboards, reducing report generation time by 2-3 hours for the operations team.
- Onboarded and integrated new log data sources, configuring props.conf, transforms.conf, and inputs.conf for accurate field extraction and data normalization.
- Documented SPL queries and dashboard logic in Confluence, enabling business users to understand and self-serve data insights.

Client: Carlsberg EU - Performance Optimization & Disaster Recovery

- Designed and deployed disaster recovery monitoring dashboards, consolidating multi-source data into a single Splunk platform and saving 3+ hours daily in reporting overhead.
- Optimized dashboard and search performance using data models, lookups, and summary indexing, reducing query load on the Splunk environment.
- Built customized Splunk alerts and scheduled reports for the operations team, cutting issue troubleshooting time by 50%.

Client: L'Oréal EU - Analytics & Business Intelligence

- Developed analytics dashboards integrating ServiceNow data into Splunk via REST API, enabling data-driven decisions and reducing reporting time by 2 hours.
- Conducted data gathering and use-case analysis sessions, translating business requirements into technical SPL implementations.

Client: Hawaiian Telecom US - Legacy Migration & Reporting Modernization

- Engineered SPL-driven dashboards to support migration from legacy reporting tools to Splunk, delivering a unified reporting and visualization platform.

Client: Kering EU - Application Support

- Performed application support in MicroStrategy and ETL flow, maintaining data flow and 100% data accuracy while resolving support tickets within SLA.

ADDITIONAL EXPERIENCE

Trenton Cold Storage Apr 2025 - Present

Walmart Canada Jun 2024 - Mar 2025

INTERNAL PROJECTS & LEADERSHIP

- Led a 4-person Splunk delivery team, distributing workload, coordinating delivery timelines, and communicating directly with clients.
- Faculty member of the Accenture Splunk Liquid Hub training program, upskilling developers on Splunk Enterprise fundamentals and administration - resulting in 50+ certified Splunk professionals.
- Delivered brown-bag sessions and mentored junior team members on Splunk troubleshooting and best practices.
- Pioneered the Asset Team at Accenture Splunk Liquid Hub: consolidated, scrubbed, and published reusable custom Splunk apps into a shared library, reducing duplicate effort for new project teams.
- **Creator of ResumeOps (jannsenagustin.github.io/resumeops)**, a technical portfolio built with Next.js, React, TypeScript, Tailwind CSS, and GitHub Actions CI/CD, documenting Splunk engineering case studies and a production-style Splunk home lab in progress.
- **Project Atlas - AI-Assisted Engineering:** Integrated AI into architecture and implementation planning, UI refinement, technical and engineering decision documentation, implementation review, and release preparation while retaining ownership of architecture, engineering decisions, validation, testing, and release approval.
- Established a repeatable AI-augmented engineering workflow using structured requirements, implementation constraints, validation criteria, and release checklists; verified implementations through code review, linting, type checking, production builds, accessibility review, and manual verification before release.

CERTIFICATIONS & TRAINING

Credly profile: credly.com/users/jannsen_agustin

- Splunk Enterprise Security Certified Admin
- Splunk Enterprise Certified Architect
- Splunk Certified Administrator
- Splunk Core Certified Power User
- Splunk Core Certified User
- Splunk Enterprise Security Training
- Splunk IT Service Intelligence (ITSI) Training
- Microsoft Azure Fundamentals (AZ-900)
- Generative AI Training | Information Security Training | Tableau Bootcamp | QlikView Bootcamp

EDUCATION

Bachelor of Arts in Asian Studies - University of Santo Tomas
